

Aliaksandr Kaptsevich

Front-end developer.

I am ready to consider your proposals.

ABOUT ME

Hello, I am a frontend developer with **2+ year of experience** in creating SPA applications using technologies such as **React, Redux, TypeScript**. Currently, I am honing my skills in this area and expanding them with new technologies. For instance, I plan to learn **Vue and React Native**, as well as spend my free time on Codewars, reading technical literature (the last book I read was "Grokking Algorithms"), and studying English

EXPERIENCE / FRONT-END DEVELOPER MAY 2021 - PRESENT

TECHNOLOGIES:

React, Redux Toolkit, TypeScript, Material UI, React Hook Form, Axios (REST-API), React-router-dom, Git

JOB RESPONSIBILITIES:

- Architectural solutions for the project (UI, BLL, DAL).
- Team development using Git.
- Development of custom hooks and React components.
- File uploads from the client.
- Working with the server using Ajax (CRUD operations, working with REST-API).
- Processing and validation of input forms.
- Performance improvement and application optimization (useCallback, useMemo, React.memo).
- Test coverage of the project (Jest).
- Pagination, search, filtering, sorting.
- Authorization flow (Registration, login, password recovery).
- Refactoring, code duplication control, and bug fixing.
- Writing utility universal functions.
